

Soil conservation effort through terracing

3.0 OPPORTUNITIES FOR PES IN KENYA

Payment for Ecosystem Services provides enormous potential in conservation of environment and providing incentives for those taking positive conservation measures. In the area of forestry there is opportunity for PES in the following:

- Payment for hydrological services such as water for domestic, industrial, irrigation and generation of hydroelectric power.
- Ecotourism and tourism: Proceeds from eco-tourism and tourism should also benefit communities that are conserving the ecosystems.
- Carbon sequestration and climate change
- Intellectual property rights
- Generation of power using wind power
- Recreation facilities such as nature walks and parks

Turasha river with clear water manifesting less sedimentation load (Right)
